Event Binding

Product-list.component.html:

```html
<h1>Product List Page</h1>

<button class="btn btn-primary" (click)='toggleImage()'>
    Show Image
</button>
```

Product-list.component.ts:

```typescript
import { Component } from "@angular/core";

@Component({
    selector:'product-list',
    templateUrl:'./product-list.component.html'
})

export class ProductListComponent{
        pageTitle: string = "Product List Page";
        imageWidth:number = 80;
        imageMargin:number = 10;

        showImage:boolean = false;

        toggleImage() : void {
            this.showImage = !this.showImage;
            // (!false = true) // (!true == false)
        console.log('Value of ShowImage inside function
::',                        this.showImage);
        }

}
```

Output:

Product List Page

Show Image
